PROCESSOR

COPIES

STAT

Dear Tom:

Enclosed, please find four (4) copies of the revised Preliminary Test Procedures for the 9-1/2" Black and White Processor. Please hand carry into Ray.

Additionally, we have been trying to get in touch with Ray for two (2) days, as he promised to provide us with information concerning his chemistry. We need to know immediately the following information:

1. What is their standard developer for:

- a. Negative films;
- b. Duplicate films;

STAT

2. What gamma do they normally work at;

3. What processing time and temperature.

Additionally, we can foresee that we probably will be running a little short of film by the time we complete our testing. Therefore if possible, we would like to request that Ray bring with him one (1) roll each of 9-1/2" x 250'
